SUMMARY

Java Full Stack Developer with **3+ years of experience** in building and deploying **scalable enterprise applications** using **Java, Spring Boot, React.js, Redux Toolkit, and REST APIs**. Proficient in **backend engineering, SQL/PostgreSQL optimization, and cloud deployment on AWS**. Skilled in **Docker, Jenkins, and Agile development**, delivering reliable, high-performance solutions across **fintech and enterprise domains**.

PROFESSIONAL EXPERIENCE

Milestone Technologies | Associate Software Engineer | Feb 2023 – Dec 2023 | India

- Developed and deployed payment microservices using **Java (JDK 11), Spring Boot, REST APIs, and JWT-based authentication**, powering transaction modules handling **50K requests/day** with consistent uptime across environments.
- Automated daily reconciliation and settlement processes through **Python and SQL scripts**, saving roughly **12 hours of manual effort per week** for the finance operations team and improving data flow between systems.
- Optimized **PostgreSQL** query performance by restructuring joins and indexes, reducing the average response time of high-traffic endpoints from **3.8s to under 1.5s**.
- Enhanced deployment efficiency by **containerizing microservices with Docker** and automating builds in Jenkins, cutting overall release time from **90 minutes to under 25 minutes** per deployment cycle.
- Supported cloud deployments by configuring **AWS services** (EC2 for hosting, S3 for storage, and CloudWatch for monitoring), ensuring stable deployment environments and faster issue resolution during release cycles.
- Designed and **integrated Apache Kafka** based event streaming to enable asynchronous communication between microservices, improving system scalability, fault tolerance, and real-time data processing.

Dell Technologies | Java Full Stack Developer | Aug 2020 – Jan 2023 | India

- Built and enhanced customer management modules using **Java, Spring Boot, and REST APIs**, enabling seamless processing of approximately **1.2 million service transactions monthly** across Dell's enterprise platforms.
- Optimized backend performance by refactoring **SQL queries** and stored procedures, reducing average query execution times by a few seconds per request and ensuring faster customer response cycles.
- Developed event-driven workflows using **AWS Lambda and S3**, automating data synchronization between **CRM** and order management systems and eliminating dozens of recurring sync issues each month.
- Integrated dynamic **React.js** components with **REST APIs** to create real-time dashboards for order tracking and system monitoring, improving usability for over **300 internal support users** globally.
- Streamlined build and deployment pipelines using **Jenkins and Docker**, reducing deployment time to under **30 minutes per release** and achieving consistent, zero-interruption rollouts across production environments.

TECHNICAL SKILLS

- Languages:** Java (8–17), Java/J2EE, JavaScript, TypeScript, SQL, Python (basic), C
- Backend:** Spring Boot, Spring MVC, Spring Security, Spring Core, Hibernate, JPA, REST APIs, Microservices
- Frontend:** React.js, Redux Toolkit, Angular (v12+), HTML5, CSS3, Bootstrap, Material UI, SASS, jQuery
- Web & Integration:** JSON, XML, Web Services
- Databases:** PostgreSQL, MySQL, Oracle, PL/SQL, MongoDB
- Messaging & Streaming:** Apache Kafka (integration with microservices)
- Cloud Platforms:** AWS (EC2, EKS, ALB, RDS, S3), Pivotal Cloud Foundry (PCF), Azure
- Web/App Servers:** Apache Tomcat, Oracle WebLogic
- DevOps & CI/CD:** Docker, Kubernetes, Jenkins pipelines, GitHub Actions, GitLab CI
- Build & Tools:** Maven, Gradle, Git, GitLab, Swagger
- Testing & QA:** JUnit, Mockito, Cucumber, Jasmine, Cypress, Postman
- Code Quality & Security Tools:** SonarQube, Veracode, JaCoCo
- Monitoring & Logging:** ELK Stack, Prometheus, Grafana, CloudWatch, Splunk
- Methodologies:** Agile (Scrum), SDLC, Waterfall
- Certifications:** AWS Certified Cloud Practitioner (AWS CCP)

PROJECTS

Restaurant Food Delivery (Microservices) [\[Link\]](#)

- Built a **microservices-based food delivery system** using **Spring Boot and Angular**, integrating **Eureka discovery, MySQL/MongoDB** storage, and containerized deployments via **Docker** on **AWS EKS**.
- Implemented an automated **CI/CD pipeline** with **Jenkins and ArgoCD**, enabling continuous, reliable releases with **GitOps workflows** and secure environment configurations.

Employee Management Portal

- Built a **full-stack HR management portal** using **Spring Boot, React.js, AWS EC2, and MySQL**, supporting **5,000+** employee records with secure authentication, role-based access control, optimized queries, and **CRUD** operations.

EDUCATION

Missouri State University, Springfield, MO, USA - Master of Science in Computer Science

Dec 2025
